# Prevention of Birth Defects Initiative – NIGF

Delighted to conduct the Prevention of Birth Defects workshop in Prayagraj, a strong start to President Dr. Ragini's vision for early detection across North India.

As Chairperson, it was an honour to lead NIGF's first simulation-based workshop, offering true hands-on training in identifying birth defects early.

Grateful to Dr. Manju Verma for her exceptional organisation and support.

This workshop sets the tone for our ongoing mission to reduce birth defects and improve maternal-fetal outcomes.
